-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05 May 2005.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on May 5, 2005 has been entered.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 112

3. Claims 1, 3-10, 12-18 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, the preamble recites a combination of a high pressure seal, a first mating part and a second mating part. The body of the claim contains functional recitation directed to the tube which is dependent on the pressurized fluid, e.g., "...said tube being expanded radially about said first axis in response to pressurized fluid..." Additionally, although claims 1, 2-10 and 12-19 are apparatus claims, applicant's argument for patentability appears to be on the basis of the operation/function/use of the device, i.e.,

Art Unit: 3752

the tube being expanded radially by the fluid pressure. The metes and bounds of the claimed invention are uncertain.

Claim Rejections - 35 USC § 102

4. Claims 1, 3, 4, 7, 8, 9, 19, 22, 23 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Stout (2,321,778).

Stout discloses a high pressure seal 13 in combination with a first mating part 10 and a second mating part 12 comprising: a tube 13

Claim Rejections - 35 USC § 103

5. Claims 5, 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pruyn (1,225,855).

Pruyn discloses the claimed invention except for thickness of the seal. It would have been obvious to one having ordinary skill in the art at the time the invention was made to make the seal (at least a portion thereof) less than 1mm thick, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233.

Response to Arguments

6. Applicant's arguments with respect to claims 1, 3-10, 12-19 and 21-23 have been considered but are moot in view of the new ground(s) of rejection.
